Enabling SNMP and LLDP on Garrettcom managed devices for network management access & topology mapping.

- 2018-02-15 - 5/10RX Routers

The main objective of this document is to demonstrate the capability of the Hirschmann HiVision network management software for managing Garrettcom line of managed Ethernet devices. This

exercise will involve configuring the Garrettcom managed devices so that they can be discovered and managed by the Industrial HiVision network management application.
